

Dear Customer,

Aqua Pennsylvania will replace the existing 6-inch cast iron water main within Willistown, Easttown and Tredyffrin townships, Chester County as part of our continuing infrastructure improvement program. The new 8-inch ductile iron water main will reduce the potential for main breaks and discolored water, and improve water flow in the area. Aqua replaced more than 17 miles of aging main in Chester County to improve service reliability for customers in 2018. Our work will be performed on the following streets:

- **Devon Road between Grubb Road and a point in front of 43 Devon Road**
- **Devon Road between S. Cedar Hollow Road and a point in front of 63 Devon Road**
- **Devon Road between S. Valley and Darby roads**

Construction on the \$750,000 project is scheduled to begin the week of July 8, 2019 with completion expected in September. Aqua will have an inspector on the job each day to answer your questions.

Following the installation of the new water main, there will be a period of time during which the main will be chlorinated and tested before being put into service. Activity on the job site will be limited during this phase. Once testing has been completed, we will transfer each water service and any fire hydrants onto the new main, then make the final connections on the side streets and abandon the old main. It is important to note that the trench will be covered with temporary black top at the end of each work day. Permanent restoration will be complete in the fall of 2019.

- **A detour will be in place for all work on Devon Road, and work hours will be from 9 a.m. to 3 p.m.**

Access will be provided for emergency, mail and trash services. Residents will have access to their properties, but at times will need to enter from different directions due to changing work zones. We will notify customers 24 hours in advance of any scheduled shutdown, however, as with any construction project, an emergency shutdown might be necessary. If so, we will restore service as soon as possible.

If you have any questions regarding the project, please contact me at 610.430.0747. Should you have an emergency, including a water quality issue, please call our Customer Service Department or emergency dispatcher at 877.987.2782.

We appreciate your patience and cooperation during this construction while we make important improvements to the water distribution system.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Rosser".
